- i) Grameenphone has received the demand note from the Bangladesh Telecommunication Regulatory Commission (BTRC) confirming the allocation of 10 MHz spectrum in 700 MHz band to Grameenphone Ltd.

This spectrum shall be effective from 01 June 2026 and shall be valid till 10 March 2039. The total amount to be paid for the assigned spectrum is BDT 21,701,533,602 (including VAT). Grameenphone Ltd. needs to pay the total amount in 10 equal yearly instalments of BDT 2,170,153,360 (including VAT) starting from 2026.

The low-band characteristics of the 700 MHz spectrum enables wider coverage per base station site for faster and more cost-effective network expansion. For customers, this will provide superior indoor signal penetration by delivering more reliable connectivity inside dense urban environments. This will also significantly strengthen nationwide mobile coverage, particularly in rural, coastal, and hard-to-reach areas of Bangladesh.
